

# BEING A PATIENT MEANS BEING A PARTNER

GETTING INVOLVED IMPROVES YOUR CARE

Patient safety is everyone's responsibility, including patients themselves.

The **Manitoba Institute for Patient Safety** is Manitoba's only dedicated patient safety educator for the public.

MIPS offers patient safety presentations to the public, which provides information, resources and tools people can use to learn:

- how to engage with their healthcare team
- how to ask questions
- how to be informed
- how to take part in decision-making
- how to advocate for themselves & others

**These presentations cover topics such as:**

- Know your patient rights
- Work with your pharmacist
- Choose your patient advocate
- Talk with your doctor
- Keeping a health plan
- Prevent Falls

If you are looking for valuable education for your community group or organization, and are interested in booking a presentation free-of-charge, please visit our website for more details.
